Segments

Sets of similar records in your dataset grouped by outcome of interest

High Average_Size(cm)

Large Snapper

This segment has the highest average size of marine fish, with a lower water temperature and a high likelihood of being Snapper.

Average Value of Average_Size(cm) 62.35

Segment size 37.0% of all records

Medium Average_Size(cm)

Average Herring on Trawl

This segment has an average size of marine fish, with an average water temperature and a high likelihood of being Herring caught using a trawl method.

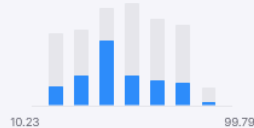

Average Value of Average_Size(cm) 54.64

Segment size 28.0% of all records

Low Average_Size(cm)

Small Cod on Line

This segment has the smallest average size of marine fish, with a higher water temperature and a high likelihood of being Cod caught using a line.

Average Value of Average_Size(cm) 51.04

Segment size 35.0% of all records

Key Similarities	Segment Rate / Segment Average	Base Rate / Base Average	Rate vs. Baseline / Average Delta
> Breeding_Season is Monsoon	51.4%	33.0%	1.6x
> Species_Name is Snapper	16.2%	12.0%	1.4x
> Region is Pacific Ocean	43.2%	34.0%	1.3x
> Average value of Water_Temperature(C) is 17.93	17.9	22.7	-20.9%
> Fishing_Method is Line	45.9%	41.0%	1.1x
